

GENERAL ASSEMBLY OF NORTH CAROLINA
SESSION 2011

FILED SENATE
May 21, 2012
S.B. 848
PRINCIPAL CLERK

S

D

SENATE DRS85249-LBf-457 (05/14)

Short Title: Durham City Assessments. (Local)

Sponsors: Senators McKissick and Atwater (Primary Sponsors).

Referred to:

1 A BILL TO BE ENTITLED
2 AN ACT INCORPORATING ADDITIONAL BASES FOR MAKING ASSESSMENTS
3 UNDER THE CHARTER OF THE CITY OF DURHAM IN THE CASE OF BOTH
4 PETITIONED AND NON-PETITIONED ASSESSMENTS.

5 Whereas, Section 77(14) of the Charter of the City of Durham (Charter) currently
6 includes limited bases for making assessments against properties benefitting from
7 improvements; and

8 Whereas, the limited bases for making assessments currently available under the
9 Charter have the potential to allocate assessments to properties in a manner that is
10 disproportionate to the benefits bestowed by the improvements to the properties; and

11 Whereas, by incorporating additional bases for making assessments into the Charter,
12 the Durham City Council will be able to apportion both petitioned and non-petitioned
13 assessments among the benefitted properties in a manner that is more reflective of the benefits
14 bestowed on the benefitted properties; Now, therefore,
15 The General Assembly of North Carolina enacts:

16 **SECTION 1.** Section 77(14) of the Charter of the City of Durham, being Chapter
17 671 of the Session Laws of 1975, as amended by Chapter 577 of the 1991 Session Laws, reads
18 as rewritten:

19 "Sec. 77. Assessments for Water, Sewer, Street, Sidewalk, Grass Plot, Lighting, and
20 Waterfront Improvements.

21 ...
22 (14) Having determined such total cost, the City Council shall thereupon make a
23 preliminary assessment as hereinafter set out in this section. Such
24 preliminary assessment shall, however, be advisory only, and shall be
25 subject to the action of the Council thereon as hereinafter set out in
26 subsection 17 of this section. The preliminary assessment shall be made on
27 the basis hereinafter set out in this subsection for the classes of
28 improvements indicated; provided, that if the petition, or the resolution, in
29 those cases where the improvement was ordered made without petition,
30 specified that there should be specially assessed against the ~~abutting~~
31 benefited property a smaller proportion of the cost of any improvement than
32 is hereinafter specified in this section, then there shall be assessed against
33 the ~~abutting~~ benefiting property only such proportion of the cost of the
34 improvement as was specified in the petition or in the resolution.

1 (a) Street paving. The total cost of any street paving improvement, exclusive of so
2 much of the cost as is incurred at street intersections and the share of street railways or
3 railroads, shall be specially assessed against the lots and parcels of land abutting directly on the
4 street paved, according to the extent of their respective frontages thereon, by an equal rate per
5 foot of such frontage. The cost of that part of the paving required to be borne by a street railway
6 or railroad, which paving is done by the City after default by the street railway in making the
7 same, as hereinbefore provided in this section, or which is done by the City by contract with the
8 railway or railroad as provided in subsection 12 of this section, shall be assessed against the
9 street railway or railroad, and the assessment shall be a lien on all of the franchises and
10 property of the street railway or railroad company, and may be collected by sale of such
11 property and franchises as is provided in subsection 23 of this section; Provided, further, that in
12 case of a corner lot, used as a single lot, the Council may provide by ordinance for the City to
13 bear a part of the cost of paving in accordance with the following formula, the amounts or
14 distances therein shown being maximum amounts or distances which may be reduced by the
15 ordinance:

16 (1) In the event that neither of the streets abutting a corner lot, used as a single
17 lot, has ever been paved, such lot shall be exempt from assessment for the
18 paving improvement along side of such lot to the extent of 20 per cent of the
19 first 150 feet thereof or 30 feet, whichever is less. Thereafter, upon the
20 paving of the intersecting street on which such lot abuts, such lot shall be
21 exempt from assessment for the paving of the street to the extent of 50 per
22 cent of the frontage on such street or 30 feet, whichever is less.

23 (2) In the event that the street along side of a corner lot, used as a single lot, is
24 paved and the intersecting street is to be paved, such lot shall be exempt
25 from assessment for the paving of the intersecting street to the extent of 50
26 per cent of the frontage thereon or 30 feet, whichever is less.

27 (3) In the event a street in front of a corner lot, used as a single lot, has been
28 paved and the street along side of such lot is to be paved, the lot shall be
29 exempt from assessment for the paving improvement along side of such lot
30 to the extent of 40 percent of the frontage on such street or 60 feet,
31 whichever is less.

32 The exemption herein provided shall apply only in areas zoned for
33 residential use or for apartments, and such portion of the cost of construction
34 as would otherwise be assessed against such corner lot shall be borne by the
35 City;

36 (b) Sidewalks. The total cost of constructing or reconstructing sidewalks shall be
37 assessed against the lots and parcels of land abutting on that side of the street upon which the
38 improvement is made, according to their respective frontages thereon by an equal rate per foot
39 of such frontage, the lots within a block being deemed to abut upon a sidewalk although the
40 latter extends beyond the lots to the curb line of an intersecting street; Provided, further, that in
41 case of a corner lot, used as a single lot, the Council may provide by ordinance for the City to
42 bear a part of the cost of sidewalk improvements in accordance with the following formula, the
43 amounts or distances therein shown being maximum amounts or distances which may be
44 reduced by the ordinance:

45 (1) In the event that neither of the streets abutting a corner lot, used as a single
46 lot, has sidewalks, such lot shall be exempt from assessment for the sidewalk
47 improvement along side of such lot to the extent of 20 per cent of the first
48 150 feet thereof or 30 feet, whichever is less. Thereafter, upon the
49 construction of sidewalks on the intersecting street, on which such lot abuts,
50 such lot shall be exempt from assessment for the sidewalk improvement on

1 the street to the extent of 50 per cent of the frontage on such street or 30 feet,
2 whichever is less.

3 (2) In the event that the street along side of a corner lot, used as a single lot, has
4 sidewalks and sidewalks are constructed on the intersecting street, such lot
5 shall be exempt from assessment for the sidewalks on the intersecting street
6 to the extent of 50 per cent of the frontage thereon or 30 feet, whichever is
7 less.

8 (3) In the event a street in front of a corner lot, used as a single lot, has
9 sidewalks and sidewalks are to be constructed on the intersecting street, the
10 lot shall be exempt from assessment for the sidewalk improvement along
11 side of such lot to the extent of 40 per cent of the frontage thereon or 60 feet,
12 whichever is less.

13 The exemptions herein provided shall apply only in areas zoned for
14 residential use or for apartments, and such portion of the cost of construction
15 as would otherwise be assessed against such corner lot shall be borne by the
16 City;

17 (c) Water mains and sewers. In the case of water mains and storm and sanitary sewers,
18 the cost of not exceeding an eight-inch water or sanitary sewer main and of not exceeding a
19 thirty-inch storm sewer main and of such portion of the mains as lie within the limits of the
20 street or streets, or parts thereof, to be improved as provided in the petition or resolution
21 ordering the same, shall be assessed against the abutting property. Such cost shall be assessed
22 against the lots and parcels of land abutting on the street or streets, or parts thereof, according
23 to their respective frontages thereon (i.e., the entire frontage benefited by the water or sanitary
24 sewer project) by an equal rate per foot of such frontage; provided, that in case of a corner lot,
25 used as a single lot, no assessment shall be made against the long side of the lot abutting on the
26 intersecting streets for any part of the frontage of such longer side of the lot except that portion
27 in excess of 150 feet if the lot is in a residential section of the City, or in excess of 100 feet if
28 the lot is in a business section of the City, and in such case the portion of the cost as would
29 otherwise be assessed against the lot shall be borne by the City; provided further, that if a water
30 or sanitary sewer main in excess of eight inches in size or a storm sewer main in excess of
31 thirty inches in size is laid in the portion of the street or streets, then the cost of the water or
32 sanitary sewer main in excess of the cost of an eight-inch main and the cost of the storm sewer
33 main in excess of a thirty-inch main shall be borne by the City, provided further, that if the
34 resolution ordered the construction of any septic tank or disposal plant, no part of the cost of
35 the same shall be specially assessed; provided further, that if the resolution ordered the
36 construction of any pumping station, force main or sanitary sewer outfall, the cost thereof may
37 be assessed against the lots and parcels of land abutting on the street or streets, or parts thereof,
38 according to their respective frontages thereon (i.e., the entire frontage benefited by such
39 pumping station, force main or sanitary sewer outfall) by an equal rate per front foot of such
40 frontage; provided, however, in the case of a corner lot, used as a single lot, where there is a
41 sewer already laid on the intersecting street on which the lot abuts and by which the lot is or
42 can be served, no assessment shall be made against the lot for the costs of any pumping station,
43 force main or sanitary sewer outfall incident to the second sewer for any part of the frontage of
44 the lot except that portion in excess of 150 feet if the lot is in a residential section, or in excess
45 of 100 feet if the lot is in a business section, and in such case the portion of the cost as would
46 otherwise be assessed against the lot shall be borne by the City. Nothing contained herein shall
47 be construed to limit the right of the City to contract with any property owner or owners for the
48 construction of any pumping station, outfall, septic tank or disposal plant or for the construction
49 of water mains or storm or sanitary sewers and for the assessment of the cost thereof according
50 to the terms of such contract;

1 (d) Water and Sewer Laterals. The entire cost of each water and sewer lateral required
2 to be laid by the owner of the property for or in connection with which such lateral is laid, but
3 laid by the City after default by the property owner in making the same as hereinbefore
4 provided, shall be specially charged against the particular lot or parcel of land for or in
5 connection with which it was made;

6 (e) Water Mains and Sewers and Laterals; Flat Rate Assessment. In lieu of assessing
7 each water and sanitary sewer improvement project on the basis of the cost of that particular
8 project, the City Council shall have authority to establish flat rates per frontage foot for the
9 assessment of property abutting water and sewer improvement projects, based on the average
10 cost of constructing 8-inch water mains and 8-inch sanitary sewer mains in the City, and shall
11 also have authority to establish flat rates for the assessment of property abutting the installation
12 of water and sanitary sewer laterals, based on the average cost of installing such laterals in the
13 City. The Council may then assess property abutting water and sanitary sewer improvement
14 projects on the basis of the flat rates so established, subject to the right of any nonpetitioning
15 property owner to have the assessment against his property adjusted as provided by law upon a
16 showing that his property has not been benefited to the extent of the assessment;

17 (f) Grass plots. The entire cost of grading or otherwise improving, or of planting, the
18 grass plots in any street or part thereof, shall be assessed against the lots and parcels of land
19 abutting on the street or part thereof wherein or whereon such improvements are made by an
20 equal rate per front foot of such frontage; provided, that this subsection shall be construed to
21 mean that when a grass plot in any street is graded or planted or otherwise improved, the cost
22 thereof shall be assessed against all of the property abutting on the street within the block
23 where such grass plot is located;

24 (g) Lighting improvements. The cost of any lighting improvement, such cost being
25 determined as provided in subsection thirteen of this section, shall be specially assessed against
26 the lots and parcels of land abutting directly on the street or streets, or part thereof, where such
27 improvement is made, according to their respective frontage thereon by an equal rate per foot
28 of such frontage;

29 (h) Water front improvements. The cost of any water front improvement shall be
30 specially assessed against the lots and parcels of land abutting on the improvement according to
31 their respective frontages thereon by an equal rate per foot of such frontage.

32 (i) In addition to the bases for making assessments for the cost of improvements
33 specified above in paragraphs (a) through (h) of this subdivision, the city council may
34 alternatively, or in conjunction, make assessments on the following bases:

35 (1) The area of land served, or subject to being served, by the improvement, at
36 an equal rate per unit of area.

37 (2) The value added to the land served by the improvement, or subject to being
38 served by it, being the difference between the appraised value of the land
39 without improvements as shown on the tax records of the county, and the
40 appraised value of the land with improvements according to the appraisal
41 standards and rules adopted by the county at its last revaluation, at an equal
42 rate per dollar of value added.

43 (3) The number of lots served, or subject to being served, where the project
44 involves extension of an existing system to a residential or commercial
45 subdivision, at an equal rate per lot.

46 (4) A combination of two or more of these alternative bases, which may also be
47 combined with the specific assessment basis listed above in paragraphs (a)
48 through (h) of this subdivision, for each class of improvement.

49 Whenever the basis selected for assessment is either area or value added, the
50 city council may provide for the laying out of benefit zones according to the
51 distance of benefited property from the improvement being undertaken, and

1 may establish differing rates of assessment to apply uniformly throughout
2 each benefit zone. For each improvement, the city council shall endeavor to
3 establish an assessment method from among the bases set out in this section
4 that will most accurately assess each lot or parcel of land according to the
5 benefit conferred upon it by the improvement."

6 **SECTION 2.** This act is effective when it becomes law.
